Guess: -3, 0, 3

FINAL ITERATION (5)						
x0	x1	x2	f(x0)	f(x1)	f(x2)	Error
2.2561	2.568	2.568	-0.2582	-0.0006989	3.001e-08	3.096e-08

By utilizing Muller's Method, initial guesses of **-3,0, and 3** were applied to the function A(x) = x^3 + 3.5x^2 - 40. After 5 iterations, the concentration of hydrochloric ions was determined to be **2.568 (denoted as x3)**. This concentration resulted in a saturated solution of magnesium hydroxide in a hydrochloric acid solution, achieving an acidity level of zero.
